If there is a "\*" next to "AIAN Persons" above, the tribe's data have been "capped". This occurs when Native American population in the tribe's service area is greater than 200% of its total tribal enrollment.

### Formula Area Population Cap

In some cases the total Native American population within a tribe's Formula Area is greater than its total tribal enrollment. In general for those cases, to maintain fairness for all tribes, the population data will not be allowed to exceed twice a tribe's enrolled population. However, a tribe subject to this cap may receive an allocation based on more than TWICE its total enrollment if it can show that it is providing housing assistance to substantially more non-member Native Americans who are members of another federally recognized tribe than it is to members.

The tribal (Alaskan Corporation) enrollment being used for your tribe is: 641
